PROFILE

I'm a full stack web developer and creative problem solver who values effective communication and collaboration between teams to achieve shared success.

I apply an optimistic approach to challenging situations and thrive in environments that are customer-centric and committed to the greater good.

EXPERIENCE

Web Development Immersive

General Assembly | 2016

An intensive three-month program focused on common best practices in object-oriented programming, MVC frameworks, data modeling, and test-driven development. Developed a portfolio of individually focused and collaboratively focused projects. Projects include:

- **Trivia Game** - https://github.com/WinishaSmith/Jeopardy_Winnie
  Jeopardy style trivia game **Technologies used:** HTML, CSS, Javascript

- **UnDone** - https://github.com/WinishaSmith/UnDone
  To-do list application. **Technologies used:** Ruby on Rails, Bootstrap, Simple Form Gem, PostgreSQL, Font Awesome (for icons)

- **Viva la Vegan** - https://vivalavegan.herokuapp.com/#/
  Team project that identifies Vegan-friendly menu options at restaurant chains. I incorporated the CRUD functionality that allows users to read, update, create, and delete restaurant. **Technologies used:** AngularJS, Rails, HTML, Sass, Bootstrap, Angular Material

Sr. Applications Specialist

(Promoted from Application Specialist in 2013)

MEDITECH, INC. | 2010 - 2016

- Led, coordinated, and supported software implementations for over 12 acute care facilities throughout the U.S. and Canada

- Achieved 95% satisfaction ratings by working with end users to determine optimal system functionality

- Executed data conversions for patient medical records and medical coding

- Managed a group of 10 colleagues as editor of the Health Information newsletter increasing division awareness of new product releases and software enhancements

- Spearheaded a 9 month redesign project of the Health Information webpage used as a resource for clients to gather product documentation and technical specifications, relative to the implementation process

- Troubleshot and resolved software configuration issues escalated by end users and the technical support team.
